

THE  
BEAUTY  
VIBE

The **VIBRA Skincare line** was created with the aim of offer the best possible synergy between cosmeceutical products and technologies made by Do Well Technologies: **Vibra B** and **Vibra Th** with selective vibrations, and Velvety with scanning light optimized OELS.

The entire line consists of advanced products, perfectly tuned with the technologies with which they are combined, able to amplify the results.

It is characterized by sophisticated technology at the service of beauty, based on the formula ***Intelligent Care System***.

They are cosmetics that can effectively combat the signs of aging. The revolutionary novelty is the use of functional substances known as bio-intelligent substances that act in completely autonomous way, localizing as a GPS the focal point of the imperfections and working on them with an intensive and profound action.

Bio-intelligent cosmetics work as a beauty laboratory equipped with the most modern computer systems. The result is a precise, targeted and specific treatment, but above all personalized for the type of imperfection on which to act, in particular by contrasting the signs caused by the passage of time.

The elixir of youth is the innovative ***Intelligent Care System***, which combines the best of nature and research in the dermocosmetic field.
